**Subject:** Additional dwellings Booilushag Maughold

Hi [REDACTED]

Further to your email please accept my apologies for not replying sooner, I did pose the question to the IRIS project manager who responded but I thought I passed this onto you so once again sorry.

There should be no problem with the treatment of foul flows from up to 8 additional dwellings in the area, but as previously stated the location of the final connections onto the foul system must be agreed with the Authority. With regard to submitting of any planning approval for the new pumping station, I understand that the Authority can undertake these works under the permitted development order therefore no application is required to be submitted. At present I have no timescale for the commencement of the new pump station but I can confirm that the necessary funding has been approved by Tynwald, it is hoped that the full 5 year programme will be available within the next few months.

I hope this helps

Kind Regards

[REDACTED]
